

# Half Marathon

Level: Local Champion

## 12 week Mesocycle for HM Race PB

Recovery 2:30 slower than 5k pace +/- 30secs

LSR 1:50 slower than 5k pace +/- 30secs

Easy 1:35 slower than 5k pace +/- 30secs

Tempo 0:30 slower than 5k pace

Intervals 0:15 faster than 5k pace

Example for Easy Pace			
5k time =	29minutes =	9:20min/miles	
9:20 + 1:35	Easy Pace =	10:55min/miles +/- 30secs	
Thus			
	Fast end	Median	Slow end
Easy Pace =	10:25	10:55	11:25

On some days your run may feel 'hard' and be at the slower end of the pace range; other days the same run may feel easy and be at the faster end of the range. Both are normal.

**Note:**  
Wednesday Workouts can be substituted for Club Group 8.  
Alternatively, Tuesday night Track can be taken and the Tuesday 'Easy' run taken as an equivalent Wednesday night Group run
